CAREER OBJECTIVE

Aspiring Web Engineer with a strong interest in building responsive and user-centric web applications, with a focus on creating efficient and scalable solutions. Seeking opportunities to apply technical and design skills to real-world projects while continuously enhancing expertise in emerging technologies.

EDUCATION

2023 – 2027	Bannari Amman Institute of Technology B.Tech-Artificial Intelligence and Machine Learning CGPA-8.04
2022 – 2023	AVP Trust National Matric Higher Secondary School HSC percent - 94

EXPERIENCE

Machine Learning Intern

Elevate Lab (45 days)

Worked as a Machine Learning Intern, gaining hands-on experience in developing and implementing machine learning models, performing data preprocessing and analysis, and strengthening problem-solving skills in a professional remote environment.

Java Programmer Intern

CodSoft (30 days)

Worked as a Java Programmer Intern, gaining hands-on experience in Java application development in a professional online environment. Followed industry-standard coding practices while enhancing problem-solving skills and gaining a strong understanding of software development processes.

SKILLS

| • English | • Tamil | • Kannada |
|-----------|---------|-----------|

PROJECTS

Responsive Portfolio

Designed and developed a self-portfolio website functioning as an online resume, highlighting projects, skills, and accomplishments with a mobile-first responsive design.

Image Authenticity and Blur Detection

Developed a machine learning system to classify images as real or AI-generated and detect blurry vs. clear images. Implemented data preprocessing and model evaluation techniques to improve classification accuracy and overall system performance.

AI Music Recommender

A Python and Streamlit-based application that provides real-time, mood-based song recommendations using the Spotify API. It features an embedded Spotify player and a favorites system with persistent storage.

Voice to Text Converter

A real-time speech recognition web app using JavaScript and the Web Speech API with multi-language support.
