CAREER OBJECTIVE

Practical experience in Python, Java, machine learning, and web development through internships and academic projects. Skilled in developing AI-powered and web-based applications using machine learning workflows, full-stack development, and problem-solving techniques. Seeking an opportunity to contribute technical skills and develop efficient, scalable solutions in a professional environment.

SKILLS

- Languages - Python, Java
- Web - Html & CSS, React
- Machine Learning - Data Preprocessing, Data Analysis, Model Evaluation
- Core concept - Object-Oriented Programming, Web Development, REST APIs
- Tools - Git, GitHub, VS Code, Figma

INTERNSHIP

Machine Learning Intern | Elevate Lab

Applied data preprocessing, analysis, and machine learning techniques using Python on real-world datasets. Implemented machine learning concepts across various stages of the ML workflow, including data preparation, model development, and evaluation. Strengthened analytical thinking and problem-solving abilities through project-based learning and practical experimentation.

Java Programmer Intern | CodSoft

Built Java-based applications using object-oriented programming principles and standard software development practices. Performed debugging and testing activities to improve code quality and application functionality. Expanded programming proficiency through hands-on development tasks in a professional remote environment.

PROJECTS

Image Authenticity and Blur Detection

Developed an AI-based image analysis system to identify AI-generated and blurred images using machine learning techniques. Implemented image preprocessing and feature extraction methods, along with a web interface for image upload and real-time result visualization.

AI Music Recommender

Built a mood-based music recommendation system using Python, Flask, Streamlit, and Spotify API integration. Implemented personalized recommendation logic and user preference management to enhance the music discovery experience.

Voice to Text Converter

Developed a real-time speech recognition application using the Web Speech API and NLP concepts. Enabled accurate voice-to-text conversion with multi-language support and an interactive user interface.

SmartService | Request Prioritization Tool

Designed and developed a full-stack web application for managing and prioritizing service requests using Role-Based Access Control (RBAC). Implemented responsive dashboards and real-time request tracking to improve service management efficiency.

EDUCATION

2023 – 2027

Bannari Amman Institute of Technology

B.Tech-Artificial Intelligence and Machine Learning CGPA-8.04

2022 – 2023

AVP Trust National Matric Higher Secondary School

HSC percent - 94
